

ELKAY® SPECIFICATIONS

Wall Mount Water Cooler Vandal-Resistant, Barrier-Free Access Model VRC8S

GENERAL

Self-contained, wall hung electric refrigerated, water cooler. Vandal-resistant unit for use in high demand locations where vandalism may occur. Rated for indoor or outdoor use.

Stainless steel construction provides vandal-resistant enclosure. Optional perforated stainless steel louver screening prevents objects from being inserted into cooler. Flow regulator provides constant stream from 20 to 105 psi water pressure. Heavy duty push button control is vandal-resistant.

Non-pressurized cooling tank is standard. Non-pressurized water tank is located after bubbler valve, so that tank is subject to line pressure only when push button is pressed.

ADA COMPLIANT

These Water Coolers comply with the requirements of A.D.A. (Americans with Disabilities Act) when properly installed. Also meets the guidelines for children's environments providing the floor to orifice height is 30" or less and proper clear floor space is provided for parallel approach. (Based on Architectural and Transportation Barriers Compliance Board final ruling.) Check Local and State Codes.

NO LEAD DESIGN

These Water Coolers are certified to be lead-free as defined by the Safe Drinking Water Act. Elkay Water Coolers are manufactured with a waterway system utilizing copper components and completely lead-free materials. These waterways have no lead because all lead materials, such as leaded brass, have been removed. All joints are brazed using silver solder only. No lead solder is permitted. A strainer with an easily cleanable screen is provided to allow trapping and convenient removal of waterborne particulate of 140 microns and larger prior to their entry into the water cooler.

CAPACITIES CHART

Model Number	Volt./ Hertz	Base Rate	**GPH of 50°F Drinking Water			Rated Watts	Full Load Amps	Glass Filler Option	Filter Option	Louver Screens	Ship. Wt. Lbs. (Kg.)
			Room Temperature °F								
			70°F (21°C)	80°F (27°C)	90°F (32°C)						
VRC8S	120V/60Hz	7.8	9.4	8.6	7.8	575	5	No	Yes	Yes	66
VRC8S2JO	220-240V/50Hz	6.5	7.9	7.2	6.5	575	2.5	No	Yes	Yes	66
VRC8S3JO	220-240V/60Hz	7.5	9.4	8.6	7.8	575	2.5	No	Yes	Yes	66
VRCDS	-	-	-	-	-	-	-	No	Yes	Yes	32

**Based on 80°F (27°C) inlet water temperature.

Rated watts shown are based on operational (run) time, in accordance with A.R.I. Standard 1010 conditions. Specific applications will determine the actual watts consumed per hour. Watts consumed will be based on number of people served per hour (usage), ambient temperatures, and inlet water temperature.

COOLING SYSTEM

Motor Compressor: Hermetically sealed, reciprocating type, 120 Volt/60 Hz, single phase or 220-240 Volt/50 Hz or 60 Hz, two phase. Sealed-in lifetime oil supply. Equipped with electric cord and three prong molded rubber plug.

Condenser: Fan cooled, copper tube with aluminum fins. Fan motor is permanently lubricated.

Cooling Unit: Combination tube-tank type. Tube portion is continuous coil of copper tubing. Fully insulated with EPS foam which meets Underwriters Laboratories Inc. requirements for self extinguishing material.

Refrigerant Control: Refrigerant HFC-134a is controlled by accurately calibrated capillary tube for positively trouble-free operation.

In keeping with our policy of continuing product improvement, Elkay reserves the right to change product specifications without notice. Please visit elkayusa.com for most current version of Elkay product specification sheets.

Model VRC8S

Temperature Control: Enclosed adjustable thermostat is factory preset. Requires no adjustment other than for altitude requirements. Easily accessible.

CONSTRUCTION

Frame: Galvanized structural steel chassis supports fountain top and cabinet panels.

Fountain Top: Series 300 one piece stainless steel top, polished to a uniform Elkay bright luster finish. Basin has embossed bubbler pad.

Vandal-Resistant Bubbler: Heavy duty, one piece construction. Keyed into position to prevent rotation. Meets UL requirements and all sanitary codes.

Cabinet: Cabinet design allows for flush to wall mounting. No recess space is required. Includes bottom cover plate fastened with vandal-resistant screws.

Color Selection: Stainless steel furnished as standard.

ALSO AVAILABLE

MODEL VRCFR8S: Same as model above, which includes frost resistant heating element. Tested to 32°F (0°C) with no wind. Specify for areas where the temperature will occasionally drop to freezing for a short period of time. (No glass filler with this option.)

MODEL VRCSC8S: Same as VRC8S with perforated stainless steel louvers screening prevents objects from being inserted into coolers.

Protected by Elkay's 5 Year Limited Warranty on the refrigeration system of the unit.

Elkay Pressure-Type Water Coolers are designed to operate on 20 psi (138 KPa) to 105 psi (724 KPa) supply line pressure. If inlet pressure is above 105 psi (724 KPa), a pressure regulator must be installed in the supply line. Any damage caused by reason of connecting this product to supply line pressures lower than 20 psi (138 KPa) or higher than 105 psi (724 KPa) is not covered by the warranty.

STANDARDS

Elkay Electric Air Cooled Water Coolers are listed by Underwriters Laboratories Inc. and comply with both Canadian and U.S. requirements.

These units comply with A.R.I. Standard 1010.

This cooler is certified by WQA to lead-free compliance including NSF/ANSI 61-ANNEX G, AB 1953.

This specification describes an Elkay product with design, quality and functional benefits to the user. When making a comparison of other producers' offerings, be certain these features are not overlooked.

Model VRC8S

ELKAY®
ROUGH-IN DIMENSIONS

Open space rough-in design permits new installation or replacement of existing fountains and coolers with this Elkay cooler when rough-in is within the outline shown.

IMPORTANT!
INSTALLER PLEASE NOTE:

This water cooler has been designed and built to provide water to the user which has not been altered by materials in the cooler waterways.

The grounding of electrical equipment such as telephone, computers, etc., to water lines is a common procedure. This grounding may be in the building but may also occur away from the building. This grounding can cause electrical feed-back into a water cooler creating an electrolysis which creates a metallic taste or causes an increase in the metal content of the water. This condition is avoidable by installing the cooler using the proper materials as shown below.

NOTICE

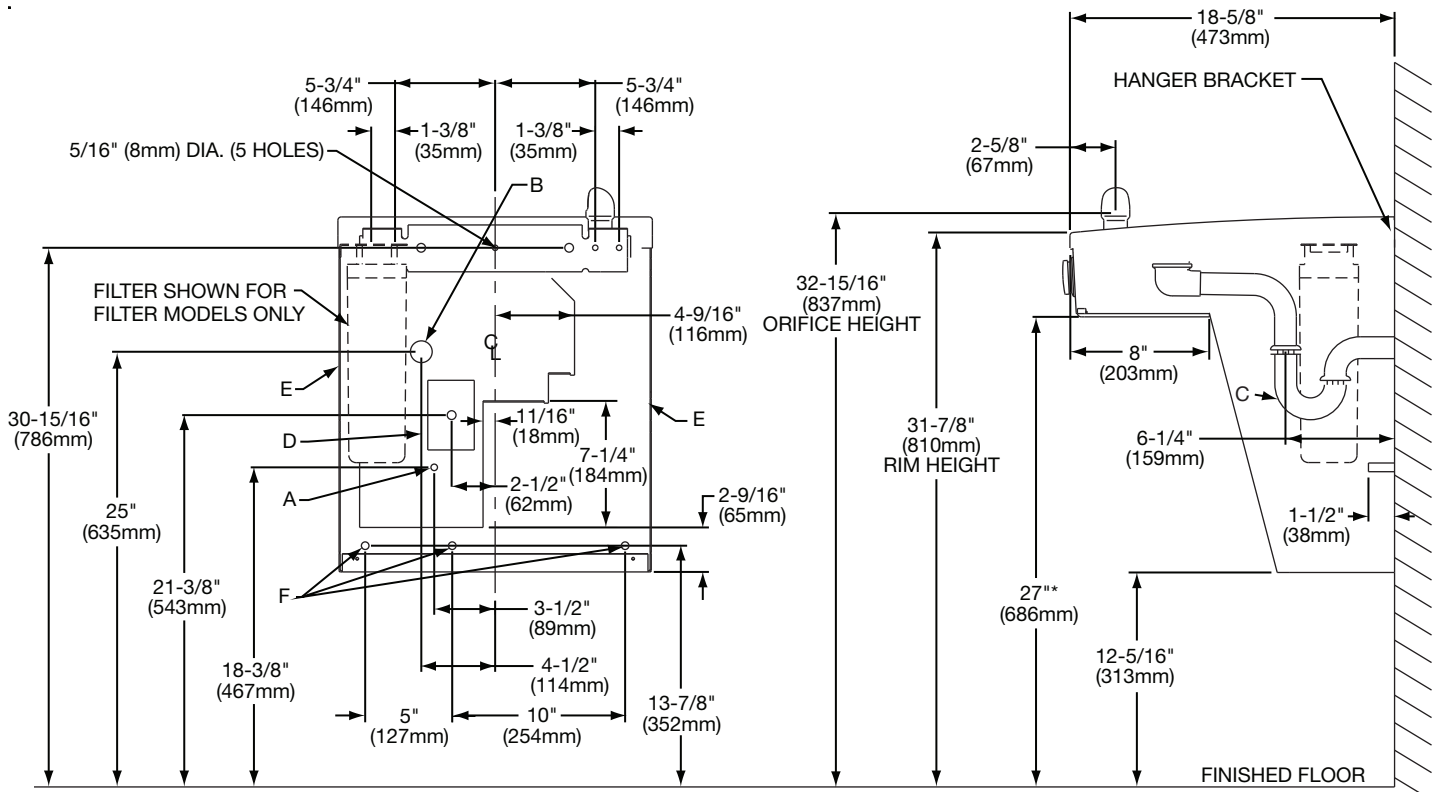

This water cooler must be connected to the water supply using a dielectric coupling. The cooler is furnished with a non-metallic strainer which meets this requirement.

The drain trap which is provided by the installer should also be plastic to completely isolate the cooler from the building plumbing system.

OPERATION OF QUICK CONNECT FITTINGS

PUSHING TUBE IN BEFORE PULLING IT OUT HELPS TO RELEASE TUBE

LEGEND

- A = RECOMMENDED WATER SUPPLY LOCATION. SHUT OFF VALVE (NOT FURNISHED) TO ACCEPT 3/8 O.D. UNPLATED COPPER TUBE. 3" (76mm) MAXIMUM OUT FROM WALL.
- B = RECOMMENDED LOCATION FOR WASTE OUTLET 1-1/4" O.D. DRAIN.
- C = 1-1/4" TRAP NOT FURNISHED
- D = ELECTRICAL SUPPLY (3) WIRE RECESSED BOX.
- E = INSURE PROPER VENTILATION BY MAINTAINING 6" (152mm) (MIN.) CLEARANCE FROM CABINET LOUVERS TO WALL.
- F = 7/16" BOLT HOLES FOR FASTENING UNIT TO WALL.
