

SPECIFICATIONS

Model 6428-C, case of 12 replacement filters; filter is used with the Haws 1200 series water coolers. It is a carbon block filter cartridge with a service life of 1 year/3000-gallons (11356 L). Filter contains an onboard chip to store total gallon usage; this chip interfaces with an Electronic Lifecycle Control system to allow water flow only until the filter reaches its total gallon capacity. Tested and certified by CSA against NSF/ANSI Standard 42 for the reduction of chlorine (taste and odor) and against NSF/ANSI Standard 53 for the reduction of lead and cysts.

APPLICATIONS

This filter cartridge is designed specifically for the Haws water cooler models 1201SF, 1202SF, 1211SF, and 1212SF.

PERFORMANCE DATA SHEET

IMPORTANT NOTICE: Read this Performance Data Sheet and compare the capabilities of this unit with your actual water treatment needs. It is recommended that, before purchasing a water treatment unit, you have your water supply tested to determine your actual water treatment needs.

Substance	Influent Challenge Concentration	Maximum Permissible Product Water Concentration mg/L or Reduction Requirement	Average Percent Reduction
Chlorine, Taste and Odor	2.0 mg/L ± 10%	≥ 50%	>97.3%
Cyst Reduction	Minimum 50,000/L	99.95%	>99.99%
Lead 6.5 pH Reduction	0.15 mg/L ± 10%	0.010 mg/L	>99.7%
Lead 8.5 pH Reduction	0.15 mg/L ± 10%	0.010 mg/L	>99.7%

This filter has been tested according to NSF/ANSI 42/53 for the reduction of the substances listed. The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42/53.

Testing was performed under standard laboratory conditions. The contaminants or other substances removed or reduced by this water treatment device are not necessarily in all users' water. Filter performance may vary based on local water conditions.
