SwirlFlo® Refrigerated Fountains with FLEXI-GUARD®

ERP2-8C

Installer

To assure you install this model easily and correctly, PLEASE READ THESE SIMPLE INSTRUCTIONS BEFORE STARTING THE INSTALLATION. CHECK YOUR INSTALLATION FOR COMPLIANCE WITH PLUMBING, ELECTRICAL AND OTHER APPLICABLE CODES. After installation, leave these instructions inside the fountain for future reference.

IMPORTANT

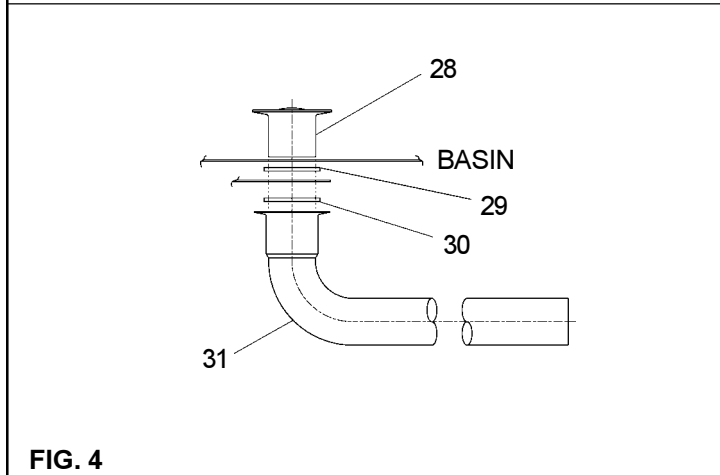

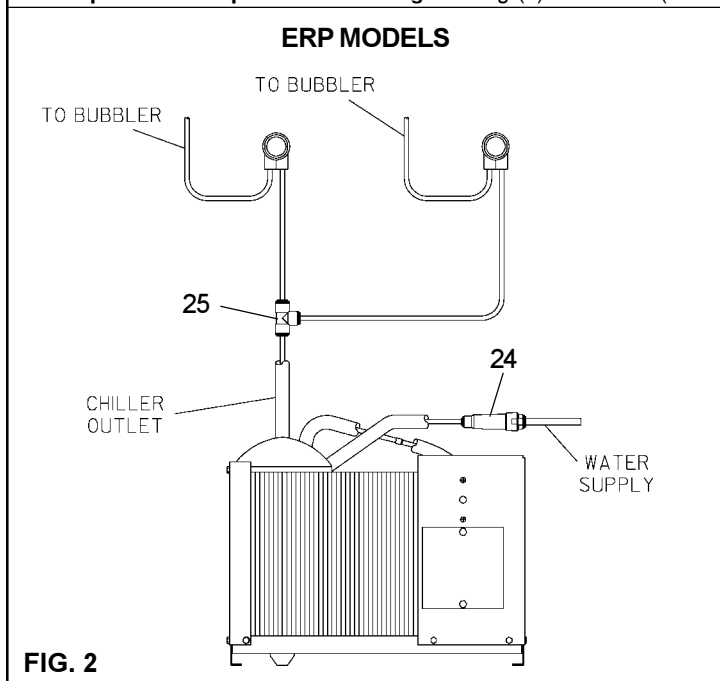

ALL SERVICE TO BE PERFORMED BY AN AUTHORIZED SERVICE PERSON

IMPORTANT! INSTALLER PLEASE NOTE.

THE GROUNDING OF ELECTRICAL EQUIPMENT SUCH AS TELEPHONE, COMPUTERS, ETC. TO WATER LINES IS A COMMON PROCEDURE. THIS GROUNDING MAY BE IN THE BUILDING OR MAY OCCUR AWAY FROM THE BUILDING. THIS GROUNDING CAN CAUSE ELECTRICAL FEEDBACK INTO A FOUNTAIN, CREATING AN ELECTROLYSIS WHICH CAUSES A METALLIC TASTE OR AN INCREASE IN THE METAL CONTENT OF THE WATER. THIS CONDITION IS AVOIDABLE BY USING THE PROPER MATERIALS AS INDICATED. ANY DRAIN FITTINGS PROVIDED BY THE INSTALLER SHOULD BE MADE OF PLASTIC TO ELECTRICALLY ISOLATE THE FOUNTAIN FROM THE BUILDING PLUMBING SYSTEM.

INSTALLATION INSTRUCTIONS

1. **Fasten mounting box into wall cutout** using (6) screws or bolts (provided by others) through holes or knockouts provided on each side of the mounting box. (See Fig. 1)
2. **Mount back panel** using (2) #8 x .50" (13mm) pan head screws and (2) large clips provided.
3. **Secure fountain body** through back panel to wall box using (4) 5/16" -18 x 1.75" (44mm) hex head bolts, (4) 5/16" - 18 nuts and (2) spacers provided. Use spacers with bottom bolts when securing fountain body. (Typical each fountain).
4. Place refrigeration package inside mounting box and connect water outlet tube on refrigeration package to water in tube on regulator holder (Item 10) with tubing and fitting provided. (See Fig 2)
5. **Water inlet is 3/8" O.D. and waste tube is 1-1/4" O.D.** (Both provided) 1-1/4" O.D. slip trap (provided by others).
6. **Connecting lines to be unplated copper and thoroughly flushed** to remove all foreign matter before connecting to refrigeration package. The furnished strainer (Item 24) should be added to the supply line.
7. **Connect refrigeration package to supply line** with a shut off valve and install a 3/8" unplated copper water line between the valve and the cooler. Remove burrs from outside of water line. Insert water line straight into fittings until they reach a positive stop, approximately 3/4" (19mm). (See Fig. 6 and 7) **DO NOT SOLDER TUBES INSERTED INTO THE STRAINER AS DAMAGE TO THE O-RINGS MAY RESULT.**
8. **Electrical: Insure power supply is identical in voltage, hertz, and phase** to that specified on the refrigeration package serial plate. Never wire compressor directly to the power supply.
9. **Turn water supply on** and check thoroughly for leaks.
10. **Release air from tank** by depressing push bar; a steady stream of water assures all air is removed.
11. **Re-check for leaks.**
12. **Stream height is factory set at 35 PSI.** If supply pressure varies greatly from this, turn adjustment screw on regulator (Item 12). Clockwise adjustment will raise the stream height and counter-clockwise adjustment will lower stream height. For best adjustment, stream should hit basin approximately 6-1/2" from the bubbler.
13. **Rotate fan blade on refrigeration package** to insure proper clearance and free fan action.
14. **Connect power supply.**
15. **Replace access panel and install grill** using (4) #8 x 1.00" (25mm) PH screws and (4) small clips provided.

TROUBLE SHOOTING AND MAINTENANCE

- Orifice Assy:** Minerals deposits on orifice can cause water flow to spurt or not regulate. Mineral deposits may be removed from the orifice with a small round file not over 1/8" diameter or a small diameter wire.
CAUTION: Do not file or cut orifice materials.
- Stream Regulator:** If orifice is free of material deposits regulate water flow according to instructions on page 3.
- CAUTION:** Cleaning of Bronzestone Models requires special care. Outer surfaces must be cleaned with a mild detergent or mixture of vinegar and water only, rinsed and wiped dry. Abrasive and acidic cleaners may eventually damage the Bronzestone finish.
